AI Quickstart for AI in the occupational therapy practice

The realistic AI use cases on one page — no hype, with clear limits.

AI in the occupational therapy practice: admin, not treatment

- 1. Drafting appointment and patient communication
- 2. Structuring correspondence with insurers and doctors
- 3. Preparing general info sheets
- 4. Internal texts and practice notices

Limit: AI gives you drafts, no guarantees. The professional and legal final check always stays with you.
