# AI Quickstart for AI for IT service providers

The realistic AI use cases on one page — no hype, with clear limits.

---

AI in the IT services business: quotes, docs and tickets, not the tech

- 1. Draft quotes and statements of work
- 2. Turn technical docs and guides into something readable
- 3. Draft ticket and support replies
- 4. Write acquisition and follow-up emails

**Limit:** AI gives you drafts, no guarantees. The professional and legal final check always stays with you.
